

# A report on the COVID-19 Bioweapon from a secondary source.

If you buy into the government “proof” that the coronavirus is natural and that it was just extraordinary bad-luck for it to strike China on the eve of their busiest holiday, then this post is not for you. This post is a link to a comprehensive report that confirms that the United States unleashed a bioweapons attack on China.

Ah. You can believe whatever you want. It’s “no skin off my back”. You can just go ahead and believe whatever makes you live through the day.

## Background

I often receive contributions from others in the form of information, links, and other data that are not usually available on the internet. When someone proposes an idea, a concept, or some information, I tend to listen to them. I might not agree with them, but if they have done their research properly and have something of value to contribute, I will provide access to their information on this site.

Thus this post.

# Cautions

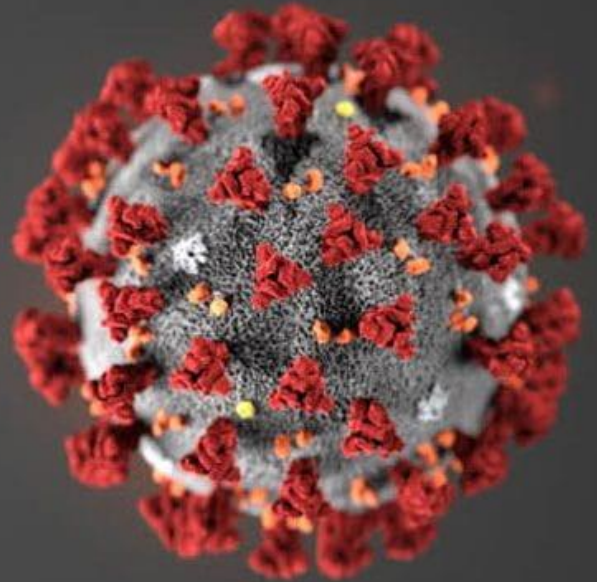

I do not agree with everything in the article, but the amount of research and the information conveyed is significant. It is worthwhile reading and I suggest you, the reader, give it every consideration.

# Content

The following is a link to a PDF file. The author devoted a significant amount of time and effort to the study of the COVID-19 bioweapons attack, and compiled the information within a PDF for ease of reading. I suggest that if the reader has any doubts that this is a natural virus, that they read this detailed summary.

You can access it here, just click on the picture below...
